## **Regional control is the answer!**

Too many Baltimore neighborhoods are cut off from the rest of the city because MDOT has systemically dismantled the systems that serve us! Without bus and rail to connect folks to the basic services, these neighborhoods are starving to death. BTEC wants to end the transportation apartheid enacted by the state. We need a system run by and for the people of Baltimore!

**A Baltimore Regional Transportation Authority (BRTA) is a way for people to control the transit that serves them. Here's how it works:**

- Your signature
- Citywide vote
- Build the Red Line, expand bus and rail service, and create a brighter more vibrant city for all!

**Because efficient, reliable transit is a tool for**

## **JUSTICE**

**better transit promotes racial, economic, disability, and environmental justice**

## **EMPOWERMENT**

**a system that allows Baltimoreans to develop and fund the bus and light rail routes that serve them**

## **+ LIVABILITY**

**better transit decreases traffic, makes jobs more accessible, and brings economic activity to our neighborhoods, increasing quality of life for all residents**
